

PAPINWIT LERTWASSANA

Full-Stack Developer

Bangkok, Thailand • +66 62 939 1415 • pae.papinwit@gmail.com • github.com/papinwit-l • papinwit-l.vercel.app

SUMMARY

Full-stack developer who builds and ships production web applications end to end — from database and API design through frontend development to server configuration and deployment. Eight years of prior carrier-grade network engineering (MPLS, BGP, ISP core) means I don't just write the app, I know how to deploy, secure, and harden it in production. Works across Next.js, React, Node.js, and headless WordPress.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Go (learning)

Frontend: React, Next.js, Tailwind CSS, HTML/CSS, Vite

Backend: Node.js, Express.js, REST API, Prisma ORM, WordPress Headless CMS, Socket.IO

Database: MySQL, PostgreSQL, MongoDB

Infrastructure: Linux (Ubuntu), VPS, SSL/TLS, DNS Management, PM2, SSH

Deployment: Vercel, Cloudways, cPanel

Networking: MPLS, BGP, IS-IS, IPv4/IPv6, VLAN, VSI, ACL, IP VPN

Tools: Git/GitHub, Postman, Figma, Puppeteer, Google Apps Script

WORK EXPERIENCE

Full-Stack Developer | TYN Moon Makers Co., Ltd. 2025 – Present

- Built a multilingual (4-language) corporate website for Asia Industrial Estate on Next.js + headless WordPress, with WeChat integration and interactive Google Maps components.
- Developed an interactive Master Plan Management System in React (Vite): plot-annotation tools with zoom/pan and an admin dashboard with search, filter, sort, and pagination.
- Secured the headless WordPress API with a custom plugin enforcing CORS policies, IP allowlisting, API-key authentication (X-API-Key), and route whitelisting.
- Hardened Express.js backends for production with Helmet security headers, CORS allowlisting, rate limiting, and trust-proxy configuration.
- Owned the full deployment pipeline: DNS migration to Vercel, Let's Encrypt SSL on Cloudways subdomains, PM2 process management over SSH, and cPanel static deployments.
- Automated internal reporting with a tool that converts Google Sheets data into templated Google Slides, cutting manual reporting time substantially.

Core Network Engineer | Triple T Broadband PCL (3BB) 2016 – 2024

- Managed ISP core network infrastructure for the Bangkok zone — 300+ routers across 6 sub-zones serving carrier-grade corporate and residential customers.
- Led the migration from a legacy Layer-2 (VLAN) architecture to a modern MPLS/IS-IS backbone with 10GE Eth-trunk interfaces, eliminating recurring broadcast-storm issues from DSLAM loops.
- Provisioned IP VPN services for corporate customers via VSI on NE40E, configuring BGP for multi-path redundancy.
- Performed traffic analysis and capacity planning to expand and rearrange topology ahead of congestion.
- Managed Huawei vendor relationships (RMA, upgrades, patching) and applied updates during maintenance windows with minimal service disruption.

PROJECTS

Kailani Villa — Next.js, Tailwind, Headless WordPress • kailanivilla.com

- Real-estate landing site built from a designer's Figma; Next.js + Tailwind frontend on a headless WordPress CMS.

The Axis Utthayan — Next.js, Tailwind, Headless WordPress • theaxis-utthayan.com

- Real-estate site with a custom TH/EN (Thai/English) internationalization layer on a headless WordPress backend.

TikTok Data Pipeline — Puppeteer, Express, Prisma

- Desktop Puppeteer app that scrapes TikTok data by hashtag (handling bot-puzzle detection) and feeds an Express REST API with Prisma ORM into a Cloudways-hosted database.

EDUCATION

Full-Stack Developer Bootcamp | Codecamp 2024

B.Eng. Electronics & Communications | KMUTT 2012 – 2016
